The Honorable Congressman Cisneros
U.S. House of Representatives
431 Cannon House Office Building
Washington, DC 20515

Dear Representative Cisneros:

As Congress develops the next legislative package of economic stabilization to respond to the threats from the Coronavirus, it is vital that any package include technical corrections to the CARES Act to assist with potential economic impacts from the Coronavirus (COVID-19).

As a designated essential service, the Orange County Sanitation District (OCSD) is seeking that you work to include a number of provisions to help us weather the COVID-19 pandemic. Our requests are grounded in the principle that the public wastewater sector provides critical health services that support stable economies and a healthy citizenry. OCSD specifically seeks that the following issues be addressed in the next phase of Coronavirus legislation:

- 1. Equal Tax Treatment:** The CARES Act provided the private sector with payroll tax credits to help offset the costs of mandatory paid sick, family and medical leave. This tax credit was denied to the public sector, even though OCSD is also liable for such payroll taxes. We urge that the prohibition on providing tax credits to public agencies, contained in the CARES Act, be repealed as part of this next phase of assistance.
- 2. Special District Eligibility for Direct Assistance:** The CARES Act provided direct assistance to state and units of local government. However, this eligibility has been interpreted not to include Special Districts. As a result, financial assistance under the Coronavirus Relief Fund (Fund) is unavailable to OCSD, denying funding to critical infrastructure. OCSD requests that you work to clarify the definition of local government to specifically include political subdivisions of a state, thereby capturing Special Districts. This is vital to allow for consideration of federal assistance that can help OCSD meet its mission to protect human health.

OCSD also wishes to take this opportunity to call for a robust federal commitment to water infrastructure. For many years, we have called on Congress and the Administration to support federal assistance to help rebuild our nation's clean water infrastructure. We understand that consideration is underway to develop infrastructure legislation that can support recovery from COVID-19.

Our Mission: To protect public health and the environment by providing effective wastewater collection, treatment, and recycling

Page two

In the past, the clean water community has repeatedly demonstrated the value and return on investment that infrastructure dollars dedicated to the clean water sector can provide. We will be reaching out to you and your staff in the near future to provide a list of projects we have planned that could greatly contribute to an economic recovery in Orange County.

Thank you for your attention to this important issue. Please do not hesitate to contact Jennifer Cabral, OCSD's Administration Manager at (714) 593-7581 or via email at jcabral@ocsd.com should you have any questions. Thank you for your continued support of the Orange County Sanitation District.

Sincerely,

David John Shawver
Board Chairman

Our Mission: To protect public health and the environment by providing effective wastewater collection, treatment, and recycling.
